HEART FAILURE MEDICATION MANAGEMENT

*For Community Pharmacists*

This event has been accredited by CPDPP for 1.5 CEUs

**Presenters:** Julia Bareham, Tahirih McAleer, Lynette Kosar

- Review medications used to treat heart failure with reduced ejection fraction – including the newer agents (i.e. sacubitril / valsartan, ivabradine, SGLT2i)
- Introduce tools for addressing common clinical concerns in heart failure medication management
- Discuss the role of the community pharmacists & ways to identify patients with heart failure in your setting
- Brainstorm ways to optimize medication management for these patients
