Dear Colleagues:

**Re: AMENDMENT - Provision of Additional COVID-19 Vaccine Booster Doses to Select Populations**

The Government of Saskatchewan has amended the information on additional booster doses for the populations living in long-term care facilities and other congregate living settings that provide care for seniors.

Effective **immediately** the following individuals are eligible to receive additional booster doses as noted in **Table 1**.

**Table 1: Eligible Populations**

Population	Interval from Primary Series to First Booster Dose	Interval Between Booster and Subsequent Dose
Adults living in Long Term Care facilities or other congregate living settings that provide care for seniors <sup>1</sup> . • Eligible for a fourth dose <b>five months</b> following their third dose.	3 months <sup>2</sup>	5 months

<sup>1</sup> Other congregate living settings include Personal care homes and assisted living facilities.

<sup>2</sup> Replaces the previous guidance of offering a booster dose with a minimum of 28 days post second dose.

**A minimum four month interval is permitted for the fourth dose to facilitate broader vaccination within long term care and other congregate living settings for seniors.**

**Moderna Dosing for Above Populations**

When Moderna vaccine is provided as a booster dose for the above population, regardless of the type of vaccine used for previous doses, a full 100 mcg (0.5 ml) dose is to be administered.

Sincerely,

Dr. Saqib Shahab  
Chief Medical Health Officer
