Pharmacy Association of Saskatchewan

RE: **Expansion of community-based pharmacist services to include vaccination for COVID-19**

As specified in the *Regulatory Bylaws of the Saskatchewan College of Pharmacy Professionals*
Part L, section 4:

General Prohibition on Administering Drugs to Certain Minors:

Notwithstanding anything in this Part L, a publicly funded vaccination may only be administered to a patient whose age is five years and over, or as may be specified by the Chief Medical Health Officer (CMHO) for the Province of Saskatchewan. Non-publicly funded vaccinations may only be administered in accordance with the age limits under the Saskatchewan Immunization Manual, Canadian Immunization Guide and the vaccine's official product monograph.

Pursuant to the above noted bylaw, effective October 29, 2021, the CMHO for the Province of Saskatchewan authorizes pharmacists to provide publicly funded COVID-19 vaccine to patients as specified in letters dated January 27, 2021, March 25, 2021, May 11, 2021, August 31, 2021, October 31, 2021 and below:

- I. Pfizer-BioNTech Cominarty® vaccine pediatric formulation – children five to 11 years of age, as per official product monograph.
- II. Pfizer-BioNTech Cominarty® vaccine adult formulation youth and adults 12 years of age or older, as per official product monograph.
- III. Moderna Spikevax® vaccine – children six to 11 years of age, as per official product monograph.
- IV. Moderna Spikevax® adult formulation youth and adults 12 years of age or older, as per official product monograph.
- V. AstraZeneca Vaxzevria® vaccine – adults 18 years of age and older, as per official product monograph.
- VI. COVISHIELD vaccine – adults 18 years of age and older, as per official product monograph.
- VII. Janssen vaccine – adults 18 years of age and older, as per official product monograph.
- VIII. Novavax NUVAXOVID™ – adults 18 years of age and older, as per official product monograph.
- IX. Medicago COVIFENZ® – adults 18 to 64 years of age, as per official product monograph.

Sincerely,

Dr. Saqib Shahab
Chief Medical Health Officer
